

career-FIT PROGRAMME PLUS

Enterprise Ireland is pleased to announce the second and final Call for Proposals for the CAREER DEVELOPMENT FELLOWSHIPS IN THE NATIONAL TECHNOLOGY CENTRE AND TECHNOLOGY GATEWAY PROGRAMME.

The programme was designed to inject new talent and resources in the R&D&I sector in Ireland by means of recruiting 50 talented researchers from all around the world through an open competition to work on industry-focused collaborative projects for three years.

Companies of **any sector** are eligible to participate!

Companies of **any size** are eligible!

Companies can be part of **any number** of applications!

Eligible partner companies are based in Ireland and have business operations that engage in commercial exchanges with the goal of earning profits; they are trading in order to make a profit. They can either already be affiliated to the Technology Centre/Technology Gateway or become affiliated as a result of the fellowship award.

Career-FIT & Career-FIT PLUS Programme Manager:
Micol Martinelli, micol.martinelli@enterprise-ireland.com

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 847402

What are the main benefits for your company?

- ◇ access to a high-caliber, experienced researcher who brings new/additional/complementary skills to your team
- ◇ opportunity to collaborate with an academic/research institution on a project that has your company's needs at its core
- ◇ enhanced international visibility
- ◇ it's free – no minimum cash contribution required
- ◇ participate in a Horizon 2020 project without any administrative requirement
